Honolulu, Hawaii 96813

Dear Mr. Pevec:

Last fall, with the assistance of the Lawrence Livermore National Laboratory (LLNL) environmental monitoring staff, we forwarded to Sanford Cohen and Associates a series of aerial photographs of various islands on Enewetak Atoll. As part of the agreement to share these maps and photographs with Sanford Cohen and Associates, they were to provide LLNL with copies of the digitized maps. It was also our understanding that Sanford Cohen and Associates would provide digitized versions of these maps that display the environmental data at each sample collection point.

To date, LLNL has only received the raw digitized form of the maps, and we would appreciate if you would follow up with Dr. John Mauro and Dr. Hans Behling to ascertain when LLNL might expect to receive the full digitized data maps as agreed. As we have previously discussed, there is much to be gained by all of us working with data that has come from such jointly shared endeavors.

I appreciate your assistance on this matter and I will look forward to hearing from you.

Sincerely,

A handwritten signature in black ink, appearing to read "Frank C. Hawkins", is written over a horizontal line.

Frank C. Hawkins
